## Maintenance tips

- 1 For dust and deposits it is sufficient to clean the surface of the skirting with a lightly dampened cloth.
- 2 Commercially available floor cleaning products with water can be utilized, whereby the dosage instruction of the corresponding cleaners must be strictly observed. Overdosing the cleaning agent may cause damage to the flooring and the skirting. Solvents or solvent-containing cleaning agents with dissolving components must not be used.
- 3 The use of cleaning agents and disinfectants, e.g. with alcoholic and alcohol-like components must previously be tested on the surface of a sample item.
- 4 The solidcore skirtings must not be cleaned with scouring agents and materials with a rough, firm surface such as abrasive sponges, brushes, or microfibre cloths.
- 5 Strong mechanical stress by brushing and rubbing dry must be absolutely avoided.

- 6 Only damp-wipe the skirtings, do not clean them using a steam cleaner. Always mop up standing moisture on the floor immediately.
- 7 Foreign substances depositing on the skirting by the processing of adjacent component parts, for example the wall and flooring such as colour, sealants, primers, etc., may be harmful to the surface and may modify it. Corresponding measures to provide protection against unintentional pollution of the profiles mounted must be implemented.

### Info from the professional:

With proper care, Döllken core skirtings are extremely robust and durable. The coated wood core offers a protected and easy to clean surface. The strip retains its shape and the decors do not lose their brilliance.
